

eSOne™ InstaNote: Rethinking Healthcare Documentation with AI-Powered Precision

eSOne™ InstaNote reinvents the way we document clinical information, harnessing the power of cutting-edge Generative AI to effortlessly transform clinical encounters into comprehensive medical documentation. Our innovative solution, integrated into the eSOne platform, guarantees a seamless and intuitive experience, available on

both web and mobile platforms. Say goodbye to tedious workflows and hello to a new era of efficient, intelligent healthcare documentation with eSOne InstaNote.

eSOne InstaNote saves you time and money while improving quality.

Save up to 90 minutes of documentation time daily

Save up to 50% of current documentation costs

Reduce provider burnout up to 75%

Additional revenue potential up to \$10k monthly

Features

Real-time completion of clinical documentation using generative AI technology

Automatically generate preliminary clinical documentation from patient-clinician conversations or dictation

Front-end speech and voice commands within the eSOne platform

Uses eSOne platform workflow and interfaces with EHR to seamlessly enter data without additional administrative tasks

Benefits

As part of the eSOne platform, there's no new training or change management required to get started

Reduce clinician burden by 50%: Ability to provide additional services, such as Orders, Pre-Charting, and Care Plans

User-friendly solution: Simplified interface for easy adoption across web or mobile apps

Improved patient experience: Eliminates distraction for physicians with recording and capturing all necessary information and taking notes real time during patient visits

The Value of eSOne InstaNote

Empowering Healthcare Providers for Enhanced Patient Care

Transcription to InstaNote Dictation

Real-Time Documentation

Document created instantly after patient visit

High-Quality Documentation (NLP)

Utilizes advanced Natural Language Processing for Accuracy

No Training Required

Quick and easy onboarding for immediate use

Transcription to InstaNote Scribing

Distraction-Free Documentation

Spend more time with patients

Increased Patient Throughput

Physicians can see more patients

Time Savings

1.5 hours of documentation time savings per day

Compared to Front-end Speech

No Training Required

Easy adoption for efficient workflow

Add-On Services

Orders, Care Plans, and Rx services to reduce administrative burden

Bring Templates With You

Flexible and customizable documentation options

Self-Documentation

Real-Time Documentation

Document created instantly after patient visit

Time Savings

1.5 hours of documentation time savings per day

Add-On Services

Orders, Care Plans, and Rx services to reduce administrative burden

A Holistic Approach for Efficiency and Compliance

Streamlined Processes

Improved physician experience through simplified workflows

License Management Made Easy

Removes administrative burdens and tracking

Operational Efficiency

Significant cost reduction with streamlined processes

Revenue Boost through increased Patient Throughput

Providers can see more patients per day leading to increased revenue

No Change Management or implementation

Smooth workflow deployment on a familiar platform for seamless implementation

Platform Optionality

Choose from transcription, scribing, and InstaNote

Business Continuity curing EHR Downtimes

Uninterrupted services allow you to be quickly back up and running

Ensuring Data Security & Compliance

The eSOne platform maintains the highest level of security with HITRUST certification
